Respected Sir Good Morning,

We **Mother Teresa Pharmacy College (7M)**, bringing to your kind notice for UG syllabi **suggestions**.

1. There is Maths subject in first year first semester B.Pharmacy, as per PCI norms maths exam is only internal exam not external exam, in many universities already they are conducting only internal exam (KU,AU,OU)So, please consider our request.
2. In First year second semester there is Pharmaceutical Biochemistry subject, as it is a very difficult subject and in the same semester they already have POC, Pathophysiology, Anatomy, Computer applications. So, please shift this subject to second year
3. There is Pharmacology subject from second year, but it should be continued upto fourth year. But there is a lack of this connection.Please take a decision.
4. In Third year of the second sem, there is a Biopharmaceutics & Pharmacokinetics subject, but not having practical class for this subject. As it is a very important subject in ceutics, students need practical knowledge.
5. In Third year of the second sem, there is a BioTechnology subject, but not having practical class for this subject. As it is a very important subject, students need practical knowledge, because biotechnology is playing a key role during COVID, that desivers lab classes.
6. There is a Jurisprudence subject in Fourth year second sem, it should in fourth year first sem
7. Industrial Pharmacy-II, is there in fourth year first sem. It should be in the second sem, so that students can utilize the knowledge for their jobs in Pharmaceutical Industries.
8. There should be a chemistry subject in final year, which are more in second year second sem (POC-III& MC-I).
9. There is no core subject in final year second sem, kindly look over this issue.

These are suggestions made by our college faculty, please consider our issues.

Thanks & Regards,

PRINCIPAL,

MOTHER TERESA PHARMACY COLLEGE,

Sathupally, Khammam District, Telangana State.
